EFFICIENCY IN THE USE OF RESOURCES FOR THE IMPROVEMENT OF SUSTAINABILITY OF VINE AND WINE SECTOR AT PRIORAT REGION

LIFE PRIORAT+MONTSANT | LIFE15 ENV/ES/000399

¿What is LIFE PRIORAT+MONTSANT?

LIFE PRIORAT+MONTSANT is a project that aims to develop and demonstrate a model of sustainable winegrowing in Priorat, by applying a set of methodologies for the efficient use of natural resources throughout the value chain, it later replicated in other wine producing regions of the European Union.

The project is carried out by five organizations: VITEC (Wine Technology Center) as coordinator, the Board of the Designation of Origin Montsant, the Council of the DOQ Priorat, the company lavola 1981 SA and Wine Technology Platform (PTV).

In this [short video](#) we present the project.

FINAL RESULTS

After four years of work with the aim of developing a sustainable production model for the wine sector in the Priorat region, the consortium shows the results obtained, as well as the environmental benefits achieved.

Among the achievements, the reduction in the consumption of irrigation water (between 25% and 35%) and 100% of the chemical fertilizers used on the studied surface stand out. Likewise, the project has managed to involve 60 wineries and more than 500 winegrowers from the Priorat region.

In the following video you can see the results and achievements mentioned:

EVENTS AND NETWORKING

Project closure event

The LIFE PRIORAT + MONTSANT project has held its final event, through an online session, to present the results achieved throughout the four-year duration of the project.

Sergi de Lamo, director of VITEC and coordinator of the project, has been in charge of opening the conference, welcoming attendees and introducing this project. Then, representatives of the DOCa Priorat, DO Montsant, Anthesis Lavola and the Technological Wine Platform, have taken the floor to delve into the main technical results obtained as a result of the execution of the project around the seven main pillars of its plan for job. Robert Savé, coordinator of Vitiviniculture of IRTA and of the Technical Commission of PTV -in its area of Climate Change and Sustainability-, has been in charge of putting the finishing touch to this day with a masterful intervention about "Post viticulture Covid: Climate Change and Sustainability".

MEJORA DE LA
SOSTENIBILIDAD VITIVINÍCOLA
DE LA COMARCA DEL PRIORAT

LIFE PRIORAT + MONTSANT es un proyecto financiado por la Comisión Europea cuyo principal objetivo es desarrollar y demostrar un modelo de producción vitivinícola sostenible a gran escala en la comarca del Priorat, mediante la aplicación de un conjunto de metodologías para el uso eficiente de los recursos naturales en toda su cadena de valor.

UN MODELO PIONERO EN PRODUCCIÓN DE VINO SOSTENIBLE EN LA COMARCA DEL PRIORAT, APLICABLE A OTRAS REGIONES VITIVINÍCOLAS ESPAÑOLAS Y EUROPEAS.
